Profesional Profile

I am a 32 year old professional who is passionate about IT technologies and their inner workings. I have a broad range of experience within the field and I make sure that I'm up to date with all the new developments and products. I currently work as an IT administrator for a Microsoft partner, my main job involves installing, configuring, and maintaining servers and their accompanying roles and programs.

On the side I also have my own company, where I deliver Linux webhosting and VPS. In addidition to that, my services also included Infrastructure analysis for small and mid sized KMO's and penetration testing.

In my spare time I'm a husband to my wonderful wife and I love to go on big walks with my Labrador.

Work Experience

IT Consultant / Administrator

Sphinx-IT - Edan Group, Full-Time

SEPTEMBER 2009 - PRESENT

As my main job I work as a consultant / administrator for the Microsoft Partner Edan. At Edan I am part of the 6 man SE team, in that team I fulfill two functions. As an administrator I am specialized in Windows & Linux server distribution and their accompanying roles and programs. And as a consultant I do IT infrastructure analysis at customer sites and deploy local - cloud infrastructure.

- Installing, configuring and maintaining Windows & Linux server
- IT Infrastructure analysis
- Customer Support
- Project Management

Webhosting - IT Consultant

Anvar IT, Own side business

JANUARI 2008 - PRESENT

Beside my main job, I also have a side business offering Linux webhosting, VPS Hosting and as IT consultant to small businesses.

- Install, configure & maintane Linux and Windows Servers
- Configure and maintane Apache webhosting
- IT Consultancy for small businesses
